

PROFILE

As a MERN Stack developer, I have a comprehensive understanding of React.js and a proven ability to craft responsive and feature-rich web applications using modern front-end technologies. Additionally, I have an understanding of three.js, next.js, bootstrap, and tailwind also. With knowledge in programming, RESTful API development, databases like MySQL and MongoDB and the help of Node.js frameworks such as Express.js, I am adept at delivering solutions.

PROFESSIONAL EXPERIENCE

Summer Internship at Web Mavens | Ahmedabad, India

May 2022 - June 2022

Front-End Developer

In my internship work, I contributed to two projects: "Calendly" and "Realtor." In the Calendly project, I utilized HTML and Tailwind CSS to create a user-friendly and visually appealing web application. Tailwind CSS allowed for efficient styling and design customization. In the Realtor project, I worked with HTML and Bootstrap to develop a responsive and optimized web application. Both projects involved collaboration with development teams to meet client requirements and deliver high-quality applications.
